Notes

I have eye surgery scheduled for the 14th, and the 15th is my assessment and then travel home day, these 2 days are already approved.

But i had an appointment this morning and the doctor tells me I need to wear an eye patch for 5 days after surgery.

Since the surgery is in my good eye, this means I won't be able to see until the eye patch is done, which will be Monday the 18th so I should be back to work that morning. FYI my right eye is a failed transplant and vision is less than 5%, just sees shadows so this surgery is of most urgency to keep my vision.
